University Credit Transfer

Proposal

- To endorse and consider a more structured and supported credit transfer arrangement for EAFU athletes

Benefits

- Improve the University experience for student athletes
- Be more adaptable to the unique needs of athletes who need to re-locate for sporting reasons
- To improve the process and outcomes for University staff involved in facilitating these processes

Background

- Identification of considerable difficulties in coordinating student-athlete transfers between Institutions
- Recognition that the G8 Unis have an agreement allowing streamlined transfers
- Recognition that Europe have successfully implemented the European Credit Transfer System (ECTS) across all participating Universities

Group Discussion Points

- Discuss any difficulties you have had at your University in facilitating a credit transfer for an athlete (inbound or outbound). What was the 'cause' of the difficulties?
- What barriers or issues can the group identify in endorsing a more structured credit transfer arrangement for EAFU athletes?
- What criteria would need to be considered for Universities to action the proposal?
